

We have developed some educational software and we own a database covering all levels of basic education from primary school through high school. Our plans for expansion of our business operations include the following:

- Build up the infrastructure to ensure fast access and to satisfy the volume that would develop with increasing demand.
- Develop a nation-wide advertising campaign to increase market awareness of our products.
- Open branch offices in key cities. Even though our website is accessible from anywhere in the PRC, course materials are not standardized throughout the PRC, and there are many differences in both the course materials and the resources among the different regions in the PRC. As a result, we believe that we can best serve the students in a region by using our branch offices to employ local teachers who understand the local educational system. In this manner, we can customize our course materials to meet the local educational requirements and develop face-to-face tutorial centers to further expand our revenue.

Training Center

We provide on-site teaching services under the “Big Classroom of the Famed Instructors,” our state-of-the-art training center in Harbin. At this center, we offer both classroom training and one-on-one tutoring. The training center has approximately 36,600 square feet, with 17 modern classrooms and a capacity for 1,200 students. The courses cover each phase of compulsory education, of which junior, middle and high school as the key part. Our courses are complimentary type with regular school classes, and will vary depending on the age of the students as well as the progress of the class. Class subjects include Math, Physics, Chemistry, English, Chinese, etc. We charge students for each class taken. Thus, we determine our enrollment by the number of classes that were taken during a given period of time, and not by the number of individual students. Since the term of the classes vary, we do not schedule classes on a semester basis.

Vocational Training

We have introduced a program of on-line vocational training services. We have collaborated with the National Association of Vocation Education of China to set up a website, www.360ve.com, which is an internet platform for training agencies and schools to offer their services. We launched www.360ve.com in September 2007. We called this program our “Millions of College Students Employment Crossroad” program. We offer job search capability and career planning courses for university students. We developed this program in response to the high jobless rate for PRC college graduates. Our program is designed to establish a long-term training program for college students to build connections with corporations and obtain educational programs prescribed by the recruiting corporations. We anticipate that we will constantly revise our materials to meet changes in the market as well as the demands of university students and graduates who enroll in our courses in order to meet their career needs.
